

Linea Classic S

The Classic is now
future proofed.

Available Configurations: EE | AV

Available Number of Groups: 1 | 2 | 3 | 4

The Classic is an industry icon machine that has evolved based on barista feedback over the past 30 years. Within the Linea Family, the Classic is the choice for barista-friendly design with a high degree of

consistency and reliability in all settings. The new features provide baristas an easier coffee making experience, while also increasing the reliability of a machine which has already set the standard in

the industry. The Classic helped to forge the world of specialty coffee and has now been future proofed to deliver unparalleled performance, durability, and great coffee for a new generation.

Classic design, contemporary options.

½ Turn Steam Valve

For quick steam activation and improved barista workflow steaming milk.

Pro App Compatible

Electronic board that will allow connectivity with the La Marzocco Pro App.

Saturated Groups

Ensure unsurpassed thermal stability, shot after shot.

Programmable Doses - AV only

Auto-volumetrics provide repeatable consistency in all settings.

High Legs - option

Makes it easier to access beneath the machine and great for lower bench heights or tall baristas.

3-button interface

Buttons of the left group (AV) or on the electronics board (EE) can be used to program the machine.

Dual PID (coffee and steam)

Allows you to electronically control coffee and steam boiler temperature.

Water Sensor - option

Measures conductivity and hardness into the machine. Monitors water quality and filtration performance.

Barista Lights - option

Can easily be fitted at bench testing to allow focus on your extraction and the cup.

Autosteam - option

Automatically stops the steam wand operation at a desired temperature, simple and effective.

Shot Timer - AV only

The digital shot timer monitors the extraction time.

Insulated Dual Boilers

Greater insulation on both reduces energy use while improves stability.

Customisation - option

New panel design makes it easier to paint. No longer is the frame visible on corners.

High Cup Rail - option

Fitted at bench testing to allow cups to be stacked higher.

Cup Warmer - option

In colder environments or open to the elements this maintains a stable cup temperature.
